SEAVEE Z PERFORMANCE MODEL LINE

SEA VEE
Boats
LEAD THE WAY

REDEFINING PERFORMANCE FROM THE BOTTOM UP

The award-winning SeaVee Z leads the way in the Offshore Center Console Performance category. Superior handling, speed and efficiency all start with the revolutionary high-tech, cross ventilated, twin stepped, cored hull. Multiple lifting bodies, each with a unique angle of attack, are designed to produce a fixed trim angle at a variety of speeds ensuring maximum efficiency, ride comfort and a clear view of the horizon at all times.

Safety at speed is paramount. To ensure safe handling during high speed maneuvers, the SeaVee Z features patented Speed-rail™ Technology. High speed turns produce opposing concentrated pressure on the speed-rails™, safely keeping the boat tracking in the desired direction without the risk of losing control. The precise handling performance of the SeaVee Z significantly enhances the safety of the operator and passengers, while producing an exhilarating ride experience.

The SeaVee Z Model line up is designed exclusively for outboard power including twin, triple and quad motor configurations. The model line up starts with the capable 322Z and includes the 340Z, the innovative 370Z, the all 400Z, and the two flagships of the Z line up - the 420Z and 450Z, capable of accommodating guests for longer range multi-day offshore adventures. Regardless of the SeaVee model you choose, we'll build the boat of your dreams.

SPECIFICATIONS 322Z

322 Z

The 322 Z offers an abundance of space and a versatile layout. Twin molded-in live wells at each corner reconfigure the aft cockpit, making it significantly deeper and more spacious. As an open fisherman, the 322Z can be rigged with multiple live wells, insulated fish boxes and various towers and rod holder layouts.
